

enCharge Version History

Version α1

- Added basic menu
- Added question/answer structure
- Added Schedule Session
- Added Dictionary
- Added Flashcards
- Added Language Select

Version α2

- Added Scheduler LIFF
- Added Question Ticketer
- Added default menu
- Fixed errors where there is no found dictionary words
- Changed how language dict is handled in code

Version α3

- Replaced text button menus with image map menus
- Added quick response buttons to topic
- Added scratch and win ticket
- More clarity on when it is a customer service rep speaking rather than the app
- Make it more clear as to how to swap to the keyboard

To Do

- when there is one dictionary entry; add it by default and alert the user
- Implement the goo.ne.jp API, it is better at translating from JP to EN
<https://labs.goo.ne.jp/api/howto/>
- A way to cancel out of a already started question string
- Flashcards to continue for more than 1 at a time
- Be able to directly reply to a rep without reselecting options
- A way to receive notifications of upcoming sessions
- Make the app seem “less cold”, maybe create mascot, improve color schemes or use less button menus and more image maps
- Include a way to review over previous activities like answered flashcard score
- Have a simple way to view customer service chat log in one easy burst
